Aspiring Computer Science & Engineering Professional

CAREER OBJECTIVE

To contribute to a forward-thinking tech organization where I can apply my knowledge in computer science, develop innovative solutions, and grow through hands-on experience in software development, system design, and emerging technologies.

SKILLS

- **Programming Languages:** C, Java, Python, HTML, CSS, JavaScript, php, Dart
- **Frameworks & Tools:** Node.js, Express.js, Flutter, SQL/MySQL, Visual Studio, Bootstrap
- **Software:** Microsoft Office, Adobe Photoshop/Illustrator, Canva
- **Other:** UI/UX Design, Troubleshooting, Graphics Design
- **Soft Skills:** Problem-Solving, Adaptability, Agile Learner

PROJECTS & EXPERIENCE

MY PROJECTS

Livinkey — Full-Stack PG Management Platform

Aug 2026 - Present

A comprehensive SaaS platform for managing PG accommodations, featuring an admin console, a public-facing website, a RESTful API, and cross-platform mobile applications.

- **Admin Interface (Frontend):** I Architected a responsive admin dashboard using HTML, CSS, and Bootstrap. Implemented a modular JavaScript architecture for managing core modules, including Tenant, Guest, Bill, PG, Maintenance, Document, and Feedback management.
- **Public Website (Frontend):** Engineered a dynamic, SEO-friendly promotional website with a custom design system and a fully functional PG search engine. Integrated a feedback system and a smart FAQ chatbot to enhance user engagement.
- **Backend API:** Designed and developed a secure RESTful API with Node.js and Express. Implemented a robust role-based access control (RBAC) system, JWT authentication with OTP verification, and seamless integration with MySQL and Cloudinary for data and media management.
- **Mobile Applications:** Built cross-platform mobile apps for both Tenants and Guests using Flutter. Integrated real-time push notifications with Firebase Cloud Messaging (FCM) to keep users informed about bills, maintenance, and other updates.

MediTrack — Medicine Reminder & Caregiver Platform

36-Hour Hackathon

A full-stack medicine reminder and caregiver management system built in a 36-hour hackathon.

- Designed and developed the cross-platform mobile application using Flutter and Dart, featuring real-time dose tracking, streak system, dark/light mode, and push notifications.
- Built the backend API with Node.js, Express.js, and MySQL, implementing JWT authentication, OTP verification, role-based access (Patient / Caregiver / Family), dose logs, and reports.
- Integrated an AI chatbot for medicine-related queries and caregiver support.
- Collaborated with 3 teammates under strict time constraints, handling both frontend and backend responsibilities and delivering a working prototype within 36 hours.

Aspiring Computer Science & Engineering Professional

HOBBIES & INTERESTS

- Football enthusiast and team player
- Cinematic content creation and poetic storytelling
- Exploring global cultures and blending Tanzanian-Indian perspectives

EDUCATION

B. Tech in Computer Science and Engineering Aug 2026 - Present

- Lovely Professional University (LPU), India
- Key Subjects: OOPs, Data Structures and Algorithms, Computer Networks, Virtualization and Cloud Computing

Diploma in Computer Science and Engineering Aug 2023 - July 2026

- Key Subjects: Data Structures, Web Development, Programming, Database Management Systems, Computer Networks and Security, Computer Architecture

Secondary Education Jan 2019 - Dec 2022

- Laureate School of Zanzibar — 2021 - 2022
 - Glorious Academy School, Zanzibar — 2019 - 2020
-
